

# Marc Barrowclift

---

## HELLO

I'm a full-stack developer with over eight years experience in the field. During those years, I constantly challenged myself to learn new things, which fostered in me a keen ability to quickly understand complex problems and deliver sustainable solutions.

## EXPERIENCE

### **Comcast, Software Engineer • (2017 - present)**

Maintained the DVR Scheduler, which dutifully calculates nearly two hundred million schedules for our customer base of nineteen million active accounts daily.

Ask me about how I...

- Gained intimate comfort and proficiency with Scylla and MongoDB
- Developed the "Saved" frontend experience for the [Stream on Flex](#) app
- Led numerous refactoring and process efficiency efforts to success

### **Independence Blue Cross, Software Engineer • (2015 - 2017)**

Began as an intern tasked only with rudimentary data analysis and quickly gained enough responsibility to lead building the member portal's notification system.

Ask me about how I...

- Quickly earned the team's respect to be reassigned employee tasks
- Worked with and around extremely old, legacy insurance mainframes
- Learned how vital collaborative work is to a team's productivity and health

### **Side Projects • (2013 - present)**

I love what I do, and that's demonstrated in my hobby projects.

Ask me about my...

- Personal blog and design playground, [barrowclift.me](https://barrowclift.me)
- Record & board game library showcase, [shelf.barrowclift.me](https://shelf.barrowclift.me)
- Podcast & music blog, [badmusichertz.com](https://badmusichertz.com)

## SKILLS

If I don't yet have experience in a particular language or framework you're looking for, I'll pick it up quickly and apply it effectively. Ask me about how I've risen to that challenge every year at Comcast.
